

NOKAMEN
120 Tablets

**PROMOTES HEALTHY KIDNEY FUNCTION AND SUPPORTS THE URINARY
SYSTEM**

SUPPLEMENTS FACTS		
Serving Size 2 Tablets		
Servings per Container 60		
Amount per serving	% Daily Value (DV)	
Three-Leaf Caper (bark) <i>(Crataeva Nurvala)</i>	200 mg	**
Tribulus extract (fruit) <i>(Tribulus Terrestris)</i>	200 mg	**
Bourhavia extract (root) <i>(Boerhavia Diffusa)</i>	140 mg	**
Asphaltum Exudate	140 mg	**
Bergenia (rhizome) <i>(Saxifraga Ligulata)</i>	120 mg	**
Bastard Teak (flowers) <i>(Butea Frondosa)</i>	80 mg	**
Muthira (seed) <i>(Dolichos Biflorus)</i>	80 mg	**
Rosemary extract (whole plant) <i>(Rosmarinus Officinalis)</i>	40 mg	**
Indian Madder extract (root) <i>(Rubia Cordifolia)</i>	40 mg	**
** Daily Value Not Established		

OTHER INGREDIENTS: Maize Starch, Polyvinylpyrrolidone (PVP K-30), Sodium Benzoate (E211), Talc (E553), Magnesium Stearate, Alkaline Salt, Silicon Dioxide, Micocrystalline Cellulose.

PROPERTIES OF COMPONENTS:

Crataeva nurvala prevents the formation of kidney stones due to antilithogenic and anticrystallizing properties. By the rapid excretion of calcium and phosphates from the urine due to the diuretic effect, Crataeva prevents the formation of crystals of calcium salts and the formation of stones in the urinary tract.

Saxifraga ligulata is widely used in folk medicine for kidney stones. The plant is known for its diuretic, anti-inflammatory, immunostimulatory and antioxidant properties.

Butea exhibits antioxidant and anti-inflammatory properties. It also has a nephroprotective effect.

Dolichos biflorus helps to dissolve urine concretions formed by calcium oxalates.

Boerhavia diffusa contains a large number of biologically active substances (flavonoids, alkaloids, steroid compounds, triterpenes, lipids, proteins, etc.), which have

antibacterial, hypoglycemic, anti-inflammatory, immunomodulatory and antispasmodic effects, and prevent the crystallization of calcium oxalates in the urine as well. By reducing the level of proteinuria the plant has a nephroprotective effect in disorders of carbohydrate metabolism.

Asphaltum has pronounced anti-inflammatory, immunostimulating and tonic properties, and can be useful in conditions accompanied by stone formation in the urinary tract.

Tribulus terrestris are able to inhibit the process of crystallization and the formation of kidney stones. This reduces the amount of urates in the blood and urine while increasing the concentration of substances that inhibit the crystallization of salts in the urine.

Rosmarinus officinalis contains a number of important biologically active compounds (rosemary, coffee and chlorogenic acids, diterpenes) which exhibit pronounced antispasmodic, anti-inflammatory and antioxidant properties.

Rubia cordifolia has a nephroprotective effect and prevents the formation of stones in the urinary tract due to antioxidant properties.

RECOMMENDATIONS FOR USE: Nokamen promotes healthy kidney function and provides urinary tract support.

METHOD OF ADMINISTRATION: Take two (2) Tablets twice daily with water after meals during first 15 days and one (1) Tablet twice a day with water after meals after the first 15 days.

DURATION OF USE: Use for 45 days.

You need 1 package for the full course.
